## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 87, 89, 118, 120, 149, 151, 180, 182, 211, and 213 are generic to a plurality of disclosed patentably distinct species comprising:

- (a) seven promoters listed in claims 87, 118, 149, 180, and 211; and
- (b) 18 antisense genes and 40 genes listed in claims 89, 120, 151, 182, and 213.

Applicant is required under 35 U.S.C. 121 to elect a single disclosed species from each of groups (a) and (b), even though this requirement is traversed.

Each of these promoters listed will have different structural and functional characteristics that are not coextensive with any other promoter, leading to different effects, e.g., amounts of transcriptional activity. Moreover, each of these genes has a different structure and therefore functional properties. For example, the antisense genes act through inhibiting the translation of mRNAs endogenously produced by a cell, while the genes will act to increase the amount of a specific protein within the cell. Moreover, each gene encodes or inhibits a gene that encodes a specific protein, which proteins have different structural and functional characteristics and therefore different effects, e.g., while CFTR may increase the conductance of a cell, p53 may act to influence the cell cycle progression of a cell. These different, non-coextensive structural and functional characteristics would pose an undue burden on the examiner to search and examine any two of the species together.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to

be obvious variants or clearly admit on the record that this is the case. In either instance, if the examiner finds one of the inventions unpatentable over the prior art, the evidence or admission may be used in a rejection under 35 U.S.C. 103(a) of the other invention.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert M Kelly whose telephone number is (571) 272-0729. The examiner can normally be reached on M-F, 9:00am-5:00pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Amy Nelson can be reached on (571) 272-0804. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
